

1. Record Nr.	UNINA9910410010603321
Titolo	Eastern European Mathematics Education in the Decades of Change // edited by Alexander Karp
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-38744-5
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (317 pages)
Collana	International Studies in the History of Mathematics and its Teaching, , 2524-8022
Disciplina	510.7101717
Soggetti	Mathematics - Study and teaching Education - History International education Comparative education Educational policy Education and state Mathematics Education History of Education International and Comparative Education Educational Policy and Politics Russian, Soviet, and East European History Russia Europe, Eastern History
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction: A Time of Changes: What Is Its Interest to Mathematics Educators? -- Chapter 1: Mathematics Education in the Czech Republic since 1989 -- Chapter 2: Mathematics Education in Eastern Germany since 1990 -- Chapter 3: Mathematics Education in Estonia since 1991 -- Chapter 4: Mathematics Education in Hungary since 1989 -- Chapter 5: Mathematics Education in Poland since 1989 -- Chapter 6: Mathematics Education in Russia since 1991 -- Chapter 7: Mathematics Education in Ukraine since 1991. Conclusion: Trends and Outcomes.

This contributed volume is devoted to the recent history and evolution of mathematics education in Eastern Europe, exploring how it was influenced by social and political changes in this part of the world. Despite the broad recognition of the importance of these changes, little scholarship exists that examines the ways in which they were followed by changes in the teaching of mathematics in the post-socialist countries. Indeed, the analyzed processes are complex and vary across the states. Accordingly, this book touches on many factors--including differences in cultures and traditions – that find expression in the teaching of mathematics. Specifically, this volume seeks to explore what changes there were in education in general and in the position of mathematics in school education in these years, and how these changes may be explained and documented; what changes there were in the content of mathematics education and its assessment, and how were they motivated and adopted; what new textbooks appeared and what new methodological ideas were offered in them; how and why mathematics teacher education and/or professional development changed; what was the role (if any) of foreign influences on mathematics education, etc. The book will be of interest to both researchers in mathematics education and practitioners-teachers, as well as a broader audience of historians and educators exploring the political aspects of education.
