Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The City of Philadelphia and Female Youth Violence -- Girls' Violent Behavior as Viewed from the Streets -- The Reasons Girls Give for Fighting -- Mothers, Daughters, and the Double-Generation Dynamic -- Culture and Neighborhood Institutions.
Sommario/riassunto	In low-income U.S. cities, street fights between teenage girls are common. These fights take place at school, on street corners, or in parks, when one girl provokes another to the point that she must either "step up" or be labeled a "punk." Typically, when girls engage in violence that is not strictly self-defense, they are labeled "delinquent," their actions taken as a sign of emotional pathology. However, in <i>Why Girls Fight</i> , Cindy D. Ness demonstrates that in poor urban areas this kind of street fighting is seen as a normal part of girlhood and a necessary way to earn respect among peers, as well as a way for girls to attain a sense of mastery and self-esteem in a social setting where legal opportunities for achievement are not otherwise easily available. Ness spent almost two years in west and northeast Philadelphia to get a sense of how teenage girls experience inflicting physical harm and the meanings they assign to it. While most existing work on girls' violence deals exclusively with gangs, Ness sheds new light on the everyday

street fighting of urban girls, arguing that different cultural standards associated with race and class influence the relationship that girls have to physical aggression.

Sommario/riassunto

This book examines the 'war on terror' and radicalisation from an ontological, non-state centric perspective. Since 9/11, criminology has developed in its study of terrorism, utilising alternative non-state centric frameworks to uncover and make visible state-initiated harm. Although progress has been achieved, criminology has continued to privilege the state, thereby failing to uncover forms of state crime and how such crimes facilitate radicalisation and terrorism. Ahmed aims to rectify this gap by demonstrating how crimes of the state have contributed to the existence of Islamist-inspired terrorism and the emergence of global Jihadist organisations like Al-Qaeda and ISIS. The 'War on Terror' abandons the dominant socially-constructed discourse and application of the 'war on terror' and instead favours a grounded approach whereby actors, actions and consequences are analysed according to the risk they represent. Ahmed achieves this grounded approach through situating state practices in international human rights law and international humanitarian law. Through documenting the intersectionality of these practices with radicalisation in the emergence of global Jihadist organisations, the book demonstrates how state crimes contribute to terrorism. Although the book sits at the intersections of critical criminology, state crime, international/transnational crime, it is relevant to all disciplines that are concerned with state crime, terrorism and radicalisation.
