Raising Awareness on the Big Picture -- Facing Cultural and Education Challenges at the EU Level: Fragmentation and Multiple Solutions.
Sommario/riassunto	The book provides a comprehensive overview of the European

Sustainability Model which cannot be properly understood without taking into account the global governance trends surrounding the topic. The author offers a fresh analysis of both theory and praxis of sustainable development in the open-ended process of EU integration by shedding new light on the often-overlooked role that law and legal science should have within the educational and cultural domains. The monograph explores the necessity of new conceptual and methodological approaches in order to understand the emerging educational and cultural challenges when it comes to their integration and intersection with sustainability in today's society, which desperately claims systemic transformations. .
