1. Record Nr.   UNINA9910410037103321

   Titolo   Smart Applications and Data Analysis : Third International Conference,
                        SADASC 2020, Marrakesh, Morocco, June 25–26, 2020, Proceedings / /
                        edited by Mohamed Hamlich, Ladjel Bellatreche, Anirban Mondal, Carlos
                        Ordonez

   Pubbl/distr/stampa   Cham : , : Springer International Publishing : , : Imprint : Springer, ,
                        2020

   ISBN   3-030-45183-6

   Edizione   [1st ed. 2020.]

   Descrizione fisica   1 online resource (366 pages)

   Collana   Communications in Computer and Information Science, , 1865-0937 ; ;
                        1207

   Disciplina   006.3

   Soggetti   Computer networks
                        Artificial intelligence
                        Computer engineering
                        Software engineering
                        Application software
                        Image processing - Digital techniques
                        Computer vision
                        Computer Communication Networks
                        Artificial Intelligence
                        Computer Engineering and Networks
                        Software Engineering
                        Computer and Information Systems Applications
                        Computer Imaging, Vision, Pattern Recognition and Graphics

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Nota di contenuto   Ontologies and Meta Modeling -- Cyber Physical Systems and Block-
                        Chains -- Recommender Systems -- Machine Learning based
                        Applications -- Combinatorial Optimization -- Simulations and Deep
                        Learning -- Workshop Session.

   Sommario/riassunto   This volume constitutes refereed proceedings of the Third International
                        Conference on Smart Applications and Data Analysis, SADASC 2020,

held in Marrakesh, Morocco. Due to the COVID-19 pandemic the conference has been postponed to June 2020. The 24 full papers and 3 short papers presented were thoroughly reviewed and selected from 44 submissions. The papers are organized according to the following topics: ontologies and meta modeling; cyber physical systems and block-chains; recommender systems; machine learning based applications; combinatorial optimization; simulations and deep learning. .
