Biodiversity Conservation and the UN's Sustainable Development Goals: India's Responses Evaluated – Particularly in Relation to SDG15 -- Chapter 16. Sustainable Development Goals: Implementation of Goal 16 by India -- Chapter 17. Trade and Sustainable Development Goals: A multi-scenario analysis for India and other Asia-Pacific countries.

Sommario/riassunto

This volume examines the practicality of achieving the UN Sustainable Development Goals in India, and includes policy analyses and statistical assessments of comparative data between India and different countries. With a focus on poverty and economics, the contributors offer sector and state specific performance analyses of each goal, determining the feasibility for different states and regions to implement a given goal under conditions of extreme poverty and economic distress. Readers will learn how to perform comprehensive economic performance analyses, and how to apply these methods at local and regional scales within the framework of sustainable development. The book will be of interest to students and researchers studying sustainable development, economics, and policy analysis, as well as NGOs and government agencies working towards achieving the SDGs in impoverished nations.
