Jarpa Dawuni and Rebecca Emiene Badejogbin -- Model, system, or node? : understanding legal education reform in twentieth-century China and beyond / Jedidiah J. Kroncke -- Transplants in Estonian legal education : influences from the US legal system / Irene Kull, Merike Ristikivi, and Aleksei Kelli -- "The turn to the west" : American legal education and educational reforms in the Swedish Welfare State, 1950-2000 / Kjell A Modeer -- The American case method and new Japanese legal education / Yoshiharu Matsuura -- Legal education in France turns its attention to the Harvard model / Jean-Louis Halperin -- American moment[s] : when, how, and why did Israeli law faculties come to resemble elite US law schools? / Pnina Lahav -- Catalytic agents? : Lon

Fuller, James Milner, and the lawyer as social architect, 1950-1969 / David Sandomierski -- Legal teaching and the reconceptualizing of the state : global law and new legal education loci / Jose Garcez Ghirardi -- Socratic method, Philippine-style : to unhave or uphold? / Emily Sanchez Salcedo -- Rethinking assumptions about the global influence of US legal education / Susan D. Carle -- The Harvard models in their native habitat and abroad : reflections / Robert W. Gordon.

Sommario/riassunto

The second half of the twentieth century witnessed the export of American power - both hard and soft-throughout the world. What role did US cultural and economic imperialism play in legal education? 'American Legal Education Abroad' offers an unprecedented and surprising picture of the history of legal education in fourteen countries beyond the United States. Each study in this book represents a critical history of the Americanization of legal education, reexamining prevailing narratives of exportation, transplantation, and imperialism. Collectively, these studies challenge the conventional wisdom that American ideas and practices have dominated globally.

Sommario/riassunto

This book provides a comprehensive overview of protection schemes used for power transformers and describes the internal fault conditions and external abnormalities that may disrupt the operation of a power transformer. It also highlights the issues of current protective schemes, which pose several challenges in terms of the detection of internal faults and abnormalities, including computational burden, reduced accuracy, difficulty to implement, increased cost, computational complexity, impermeability to high resistance faults (HRF), and malfunction in conditions like cross-country fault. To address these problems, the book develops an effective novel transformer protection scheme that can eliminate all the said difficulties using an innovative algorithm. Given its scope, it is a useful resource for researchers and practitioners working in the field of power system protection, allowing them to design novel protection schemes, and providing insights into the hardware validation of developed technique.
