

1. Record Nr.	UNINA9910411944803321
Titolo	Congenital Cystic Lung Disease : Comprehensive Understanding of its Diagnosis and Treatment from Fetus to Childhood / / edited by Haruhiko Sago, Hiroomi Okuyama, Yutaka Kanamori
Pubbl/distr/stampa	Singapore : , : Springer Singapore : , : Imprint : Springer, , 2020
ISBN	981-15-5175-8
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (VIII, 140 p. 83 illus., 54 illus. in color.)
Disciplina	616.99424
Soggetti	Children - Surgery Epidemiology Pathology Pediatric Surgery Cirurgia infantil Malalties de l'aparell respiratori en els infants Malalties hereditàries Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	1 Novel classification of congenital cystic lung disease -- 2 Epidemiology of congenital cystic lung disease -From Japan Nationwide Survey -- 3 The fetal diagnosis and therapy for congenital cystic lung disease -- 4 Fetal diagnostic imaging of congenital cystic lung disease -- 5 Perinatal care for severe congenital pulmonary airway malformation -- 6 Postnatal imaging diagnosis of congenital cystic lung disease -- 7 Perinatal natural history and treatment of congenital lung malformations in prenatally diagnosed neonates -- 8 Surgical treatment for and prognosis of congenital pulmonary airway malformation -- 9 Surgical treatment for bronchial obstruction -- 10 Intralobar pulmonary sequestration -- 11 Surgical treatment and its prognosis for extra-lobar pulmonary sequestration without foregut communication -- 12 Surgical treatment and its prognosis for extra-lobar pulmonary sequestration with foregut communication - Communicating Bronchopulmonary Foregut Malformation (CBPFM) --

13 Endoscopic surgery for pediatric congenital cystic lung disease --
14 Pathology of congenital cystic lung diseases -- 15 The long-term outcome of congenital cystic lung disease.

Sommario/riassunto

This book offers readers a comprehensive understanding of congenital cystic lung disease based on a novel classification system recently proposed by leading researchers in the field. Presented in detail here, it includes various aspects, from fetal diagnosis and treatment to postnatal diagnosis and treatment, while also taking into account endoscopic surgical treatment and pathological diagnosis. Given the depth and breadth of its coverage, *Congenital Cystic Lung Disease* will be of interest not only to pediatric surgeons but also to pediatric respiratory physicians, neonatologists, and obstetricians engaged in fetal diagnosis and therapy, as well as pediatric radiologists and pathologists.
