Autore	Hardie Beth
Titolo	Studying Situational Interaction : Explaining Behaviour By Analysing Person-Environment Convergence // by Beth Hardie
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	9783030461942 3-030-46194-7
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (xv, 106 pages)
Collana	SpringerBriefs in Criminology, , 2192-8533
Disciplina	364
Soggetti	Personality Social psychology Criminal behavior Criminology Research Personality and Social Psychology Criminal Behavior Research Methods in Criminology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1: Why and how criminology must integrate individuals and environments -- Chapter 2: Integrating individuals and environments: A Situational approach to studying action -- Chapter 3: Evidencing situational interaction without situation-level exposure data -- Chapter 4: Collecting and analysing situation-level exposure data: Clarifying appropriate analysis of person-environment convergence to explain action.
Sommario/riassunto	In response to misconceptions and sub-optimal assessment of situational interaction in the criminological literature, this volume is a comprehensive resource for researchers of person-environment interaction in human behavioural outcomes, with a focus on acts of crime. It provides a bridge between strong complex theory about causal situational interaction in crime and the appropriate methods for empirically testing proposed situational mechanisms. It is underwritten

by the principle that research should be driven by theory and served by method. This volume clarifies the key concepts of interaction and situation within the framework of Situational Action Theory (SAT). It details the implications of these conceptual issues for an appropriate integrative analytical approach to data collection and analysis that places situational interaction at the heart of research into the causes of behaviour (such as acts of crime). Using existing examples of attempts to analyse person-environment interaction, the volume distinguishes and showcases different methods and evaluates their appropriateness for the study of situational interaction in behaviour. Appropriate for researchers in criminology and the behavioural sciences more generally, *Studying Situational Interaction* is essential for those studying the individual and environmental causes of human actions such as crime.
