Sommario/riassunto	The book examines how the European Union, which in the past had tended to be seen by India as an undervalued partner, is now increasingly part of most conversations in fields like the economy, technology, standards, best practices, development, defence and security. The book shows that the renewed focus on Europe is the

result of changing geopolitics, India's own priorities, Europe's growing relevance in the post-Brexit era, China's expanding footprint in the continent, and the search for alternatives to the loss of the UK as the gateway to Europe. The uncertainty inherent in the Brexit process and with the UK ceasing/having ceased to be the traditional gateway to Europe, India has been compelled to revisit, re-examine and rethink its own policies towards Europe and search for alternatives to Britain.
