   Disciplina   005.8

   Soggetti   Computer networks - Security measures
                        Computer security
                        Wireless communication systems - Security measures

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Sommario/riassunto   Since its inauguration in Taipei in 2006, ASIACCS, the ACM Asia
                        Conference on Computer and Communications Security, has become an
                        integral part of scientific community in the field of security and privacy.
                        It has since been held in Singapore (2007), Tokyo (2008), Sydney
                        (2009), Beijing (2010), Hong Kong (2011), Seoul (2012), Hangzhou
                        (2013), Kyoto (2014), Singapore (2015), Xi'an (2016), Abu Dhabi
                        (2017), and Songdo (2018). ASIACCS 2019 takes place in Auckland,
                        New Zealand where it is organized by the University of Auckland. We
                        received 258 submissions. This year's Program Committee, comprising
                        98 security researchers from 24 countries, evaluated submissions
                        through a rigorous three-phase review process. In the end, 44 full
                        papers and 14 short papers were accepted for presentation at the
                        conference, giving an acceptance rate of about 17% (22% including
                        short papers). We have a strong technical program along with five
                        specialized pre-conference workshops and three invited keynotes. Our
                        three distinguished keynote speakers are Virgil Gligor (Carnegie Mellon
                        University, USA), Heiko Mantel (TU Darmstadt, Germany), and Surya
                        Nepal (CSIRO Data61, Australia). The pre-conference workshops are the
                        Seventh International Workshop on Security in Cloud Computing (SCC),

the Sixth ACM ASIA Public-Key Cryptography Workshop (APKC 2019), the Fifth ACM Cyber-Physical System Security Workshop (CPSS 2019), the Third ACM Workshop on Blockchains, Cryptocurrencies and Contracts (BCC 2019), and the ACM International Symposium on Blockchain and Secure Critical Infrastructure (BSCI 2019).
