

1. Record Nr.	UNISA996386986803316
Autore	Manton Thomas <1620-1677.>
Titolo	XVIII sermons on the second chapter of the 2d Epistle to the Thessalonians [[electronic resource]] : containing the description, rise, growth, and fall of Antichrist : with divers cautions and arguments to establish Christians against the apostacy of the Church of Rome : very necessary for these times // by that late reverend and learned divine, Thomas Manton .
Pubbl/distr/stampa	London, : Printed by J.D. for J. Robinson ... and E. Aylmer ..., 1679
Descrizione fisica	[8], 476 p
Soggetti	Antichrist Sermons, English - 17th century
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Reproduction of original in Duke University Library.
Sommario/riassunto	eebo-0040

2. Record Nr.	UNINA9910412115403321
Autore	Igartua Monica Aguilar
Titolo	Proceedings of the 16th ACM International Symposium on Performance Evaluation of Wireless Ad Hoc, Sensor, & Ubiquitous Networks / / Monica Aguilar Igartua, [and three others]
Pubbl/distr/stampa	New York : , : Association for Computing Machinery, , 2019
Descrizione fisica	1 online resource (87 pages) : illustrations
Disciplina	004.165
Soggetti	Mobile computing Ubiquitous computing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>It is our great pleasure to welcome you to the 16th ACM International Symposium on Performance Evaluation of Wireless Ad Hoc, Sensor, and Ubiquitous Networks (PE-WASUN'19) that takes place in Miami Beach, FL, USA, on November 25th - 29th, 2019. This year's ACM PEWASUN symposium brings together scientists, engineers, and practitioners to share and exchange their experiences, discuss challenges, and report state-of-the-art and in-progress research on all aspects of wireless ad hoc, sensor, and ubiquitous networks with a specific emphasis on their performance evaluation and analysis. The mission of the symposium is to share novel approaches for monitoring, measuring, modeling, simulating, analyzing, optimizing and case studying the characteristics of ad hoc, sensor, pervasive and ubiquitous networks, as well as exploring and developing new ad hoc networking protocols and tools. ACM PE-WASUN gives researchers and practitioners a unique opportunity to share their perspectives with others interested in the various aspects of performance evaluation. The call for papers attracted a high number of submissions from Europe, North and South America. The technical program committee accepted 13 regular papers, which cover a variety of topics, including experimental analysis, simulation, design and performance evaluation of routing, vehicular and sensor</p>

networks. We hope that these proceedings will serve as valuable references for researchers and developers in the field of wireless ad hoc, sensor and ubiquitous networks. Putting together ACM PE-WASUN'19 was a team effort. First of all, we would like to thank the authors for providing the content of the program. We would like to express our gratitude to the program committee and external reviewers, who worked very hard in reviewing papers and providing suggestions for their improvements. Also we are grateful to our poster and publicity chairs for their good work. Finally, we would like to thank our sponsor, ACM and ACM SIGSIM for their continued support of these successful meetings.

3. Record Nr.	UNINA9910967362203321
Autore	Gerdes Paulus
Titolo	Adventures in the world of matrices / / Paulus Gerdes
Pubbl/distr/stampa	New York, : Nova Science Publishers, c2007
ISBN	1-60692-755-8
Edizione	[1st ed.]
Descrizione fisica	1 online resource (208 p.)
Collana	Contemporary mathematical studies
Disciplina	512.9/434
Soggetti	Matrices Algebra
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.

Sommario/riassunto

The purpose of the book is to give the reader a feeling for the beauty and the surprises of mathematical research by building up step by step a theory of cycle matrices. The notions of matrix and cycle are presented for those readers who do not yet know the concepts. Then, starting and experimenting with cycle matrices of low dimensions and engaging the readers in various activities, beautiful results are obtained with attractive geometrical interpretation. Gradually the results are extended to cycle matrices of higher dimensions and then generalised. A note is included for those readers who would like to use a computer in exploring cycle matrices. Two appendices give the possibility to further use the computer by exploring inverses matrices and determinants.
