Nota di bibliografia	Includes bibliographical references.

2. Record Nr.	UNINA9910412116503321
Autore	Min Geyong
Titolo	Proceedings of the 15th ACM International Symposium on QoS and Security for Wireless and Mobile Networks / / Geyong Min and Ahmed Mostefaoui
Pubbl/distr/stampa	New York : , : Association for Computing Machinery, , 2019
Descrizione fisica	1 online resource (109 pages) : illustrations
Disciplina	364.16
Soggetti	Computer crimes Computer science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>We welcome you to the 2019 ACM symposium on QoS and Security for Wireless and Mobile Networks (ACM Q2SWinet 2019), to be held at Miami Beach (USA). Continuing in the tradition of Q2SWinet symposium series, which have been established as well known meeting points for exchanging ideas, sharing experiences and discussing solutions among researches and professionals, this year's edition proposes an exciting program covering broad issues on QoS and security in wireless and mobile networked systems. The call for paper attracted submissions from North-America (USA and Canada), South-America (Brazil, etc.), Europe (France, Italy, etc.), Asia (China, etc.) as well as Africa, which shows the international dimension of the symposium. The program committee reviewed all papers and accepted 13 technical papers for presentation, which represents an acceptance ratio of roughly 25%. We thank all the actors of this Q2SWinet edition: firstly, authors for providing the content of the program; secondly, members of the program committee for their valuable efforts in reviewing papers and providing feedback for authors.</p>
