Titolo	Proceedings of the 12th Workshop on Multimedia for Cooking and Eating Activities // Ichiro Ide, Yoko Yamakata, Atsushi Hashimoto
Pubbl/distr/stampa	New York, NY : , : Association for Computing Machinery, , 2020
Descrizione fisica	1 online resource (19 pages)
Disciplina	006.7
Soggetti	Multimedia systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>It is our pleasure to welcome you to the 12th Workshop on Multimedia for Cooking and Eating Activities in conjunction with ICMR2020 (CEA'20) held in Dublin, Ireland. Cooking and eating have been the most fundamental activities of humankind since the ancient days until now, which affect various aspects of human life such as health, dietary, human communication, safety of food, entertainment, culinary art, welfare, and so on. However, many people who cook at home require supports for cooking because it requires experience and knowledge. They may also need support for food-logging and menu planning for the health of their family. Needless to say, support for a good and enjoyable dinner would improve the quality of life. On the other hand, systematic cooking and eating support for the elderly and/or physically challenged people are significantly important.</p>
