1. Record Nr. UNINA9910412122203321 Autore Cavallaro Lorenzo Titolo Proceedings of the 12th ACM Workshop on Artificial Intelligence and Security / / Lorenzo Cavallaro [and six others] New York, NY:,: Association for Computing Machinery,, 2019 Pubbl/distr/stampa Descrizione fisica 1 online resource (117 pages) 005.8 Disciplina Soggetti Computer security Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Sommario/riassunto It is our pleasure to welcome you to the 12th ACM Workshop on Artificial Intelligence and Security - AISec 2019. AISec, having been annually co-located with CCS for 12 consecutive years, is the premier meeting place for researchers interested in the intersection of security. privacy, AI, and machine learning. Its role as a venue has been to merge practical security problems with advances in AI and machine learning. In doing so, researchers also have been developing theory and analytics unique to this domain and have explored diverse topics such as learning in game-theoretic adversarial environments, privacypreserving learning, and applications to malware, spam and intrusion detection. AISec 2019 received 40 submissions, of which 10 (25%) were selected for publication and presentation as full papers. Submissions

arrived from researchers in many different countries, from a wide

variety of institutions both academic and corporate.
