Sommario/riassunto

In today's climate, academics, professional community and policy makers all have input in critical gender issues, as well as in the entrepreneurship and human capital issues. Various gender issues are published involving many scientific fields, including business, management and accounting research. Presenting the topic of gender issues, entrepreneurship and human capital, this book collects the main output of the researches presented at the Annual Workshop of IPAZIA 2019 of Rome in Italy. The authors provide a renewed and fruitful analysis of these topics, with the purpose of advancing the gender theories in the international context.
