Sommario/riassunto

Nobody doubts that politicians ought to fulfil their promises - what people cannot agree about is what this means in practice. The purpose of this book is to explore this issue through a series of case studies. It shows how the British model of politics has changed since the early twentieth century when electioneering was based on the articulation of principles which, it was expected, might well be adapted once the party or politician that promoted them took office. Thereafter manifestos became increasingly central to electoral politics and to the practice of governing, and this has been especially the case since 1945. Parties were now expected to outline in detail what they would do in office and explain how the policies would be paid for. Brexit has complicated this process, with the 'will of the people' as supposedly expressed in the 2016 referendum result clashing with the conventional role of the election manifesto as offering a mandate for action.

Sommario/riassunto

This open access book constitutes the proceedings of the 24th International Conference on Agile Software Development, XP 2023, which took place in Amsterdam, The Netherlands, during June 13-16, 2023. XP is the premier agile software development conference combining research and practice. It is a unique forum where agile researchers, practitioners, thought leaders, coaches, and trainers get together to present and discuss their most recent innovations, research results, experiences, concerns, challenges, and trends. XP conferences provide an informal environment to learn and trigger discussions and welcome both people new to agile and seasoned agile practitioners. This year's conference was held with the theme "Whole Team Sustainability". The 11 full papers and 1 short paper presented in this volume were carefully reviewed and selected from 40 submissions. They focus on agile practices and agile in the large.
