Sommario/riassunto

Unanimement dans le monde, on reconnait l'information comme la cheville ouvriere du developpement durable et equitable. En Afrique cependant, plus particulierement pour les femmes vivant en milieu rural, l'acces a l'information est limite. Les nouvelles technologies de l'information et des telecommunications (TIC), axeées pour la plupart sur Internet, offrent la chance d'eliminer ce desequilibre. Les essais de ce livre portent sur l'incidence actuelle et possible de l'explosion des TIC en Afrique. Ils se penchent principalement sur les problemes lies a l'inegalite des sexes et analysent la mesu

Sommario/riassunto

This book examines trades in animals and animal products in the history of the Indian Ocean World (IOW). An international array of established and emerging scholars investigate how the roles of equines, ungulates, sub-ungulates, mollusks, and avians expand our understandings of commerce, human societies, and world systems. Focusing primarily on the period 1500-1900, they explore how animals and their products shaped the relationships between populations in the IOW and Europeans arriving by maritime routes. By elucidating this fundamental yet under-explored aspect of encounters and exchanges in the IOW, these interdisciplinary essays further our understanding of the region, the environment, and the material, political and economic history of the world.
