

1. Record Nr.	UNINA9910416096503321
Titolo	Behavioral Pharmacology of the Cholinergic System [[electronic resource] /] / edited by Mohammed Shoaib, Tanya L. Wallace
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-56013-9
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (250 pages)
Collana	Current Topics in Behavioral Neurosciences, , 1866-3370 ; ; 45
Disciplina	591.188
Soggetti	Neurosciences Neurociència cognitiva Sistema nerviós Farmacología Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	A Review of the Cholinergic System and Therapeutic Approaches to Treat Brain Disorders -- Acetylcholine and Spontaneous Recognition Memory in Rodents and Primates -- Endogenous Acetylcholine and Its Modulation of Cortical Microcircuits to Enhance Cognition -- Cholinergic Signaling Dynamics and Cognitive Control of Attention -- Involvement of Nicotinic Receptors in Working Memory Function -- Nicotinic Receptors Underlying Nicotine Dependence: Evidence from Transgenic Mouse Models -- Cholinergic Receptors and Addiction -- Behavioral and Molecular Basis of Cholinergic Modulation of Pain: Focus on Nicotinic Acetylcholine Receptors -- An Evolving Therapeutic Rationale for Targeting the 7 Nicotinic Acetylcholine Receptor in Autism Spectrum Disorder -- Activators of 7 nAChR as Potential Therapeutics for Cognitive Impairment.
Sommario/riassunto	The molecular genetics of the cholinergic system including both muscarinic and nicotinic acetylcholine receptors, cholinesterases, acetylcholine synthesis and release have provided significant insights into potential targeting for pharmacological intervention. Cholinergic drugs are being used or evaluated for the treatment of diseases. Thus,

this volume aims to broaden our understanding of the current state of cholinergic mechanisms to enable implementation of novel approaches for the development of more effective treatments.

Monografia

Bibliographic Level Mode of Issuance: Monograph

Includes bibliographical references and index.

Preliminary Material -- Introduction -- Oral and written traditions in South Sulawesi -- A historical perspective on the geography and peoples of the Ajattappareng region -- Origin and precedence in Ajattappareng A historical perspective -- Ajattappareng 1200 to 1600 -- Conclusion -- The tributary and domain lists of Ajattappareng -- Archaeological survey data -- Transliterations and translations of Iontaraq texts -- European maps from Chapter III -- Four European maps showing Durate -- List of informants -- Glossary -- Bibliography -- Index.

The period 1200-1600 CE saw a radical transformation from simple chiefdoms to kingdoms (in archaeological terminology, complex chiefdoms) across lowland South Sulawesi, a region that lay outside the 'classical' Indicized parts of Southeast Asia. The rise of these kingdoms was stimulated and economically supported by trade in prestige goods with other parts of island Southeast Asia, yet the development of these kingdoms was determined by indigenous, rather than imported,

political and cultural precepts. Starting in the thirteenth century, the region experienced a transition from swidden cultivation to wet-rice agriculture; rice was the major product that the lowland kingdoms of South Sulawesi exchanged with archipelagic traders. Stephen Druce demonstrates this progression to political complexity by combining a range of sources and methods, including oral, textual, archaeological, linguistic and geographical information and analysis as he explores the rise and development of five South Sulawesi kingdoms, known collectively as Ajattappareng (the Lands West of the Lakes). The author also presents an inquiry into oral traditions of a historical nature in South Sulawesi. He examines their functions, their processes of transmission and transformation, their uses in writing history and their relationship to written texts. He shows that any distinction between oral and written traditions of a historical nature is largely irrelevant, and that the South Sulawesi chronicles, which can be found only for a small number of kingdoms, are not characteristic (as historians have argued) but exceptional in the corpus of indigenous South Sulawesi historical sources. The book will be of primary interest to scholars of pre-European-contact Southeast Asia, including historians, archaeologists, anthropologists, linguists and geographers, and scholars with a broader interest in oral tradition and the relationship between the oral and written registers.
