

1. Record Nr.	UNINA9910416104003321
Titolo	Ethnobotany of the Andes // edited by Narel Y. Paniagua-Zambrana, Rainer W. Bussmann
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-28933-8
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (1411 illus., 1406 illus. in color. eReference.)
Collana	Ethnobotany of Mountain Regions, , 2523-7497
Disciplina	578.012 578.09
Soggetti	Plants - Evolution Plants - Development Plant physiology Plant biotechnology Plant diseases Plant Evolution Plant Development Plant Physiology Plant Biotechnology Plant Pathology Etnobotànica Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Andes – Introduction to the Region -- Colombia -- Ecuador -- Peru -- Bolivia -- Plant profiles.
Sommario/riassunto	Research in recent years has increasingly shifted away from purely academic research, and into applied aspects of the discipline, including climate change research, conservation, and sustainable development. It has by now widely been recognized that “traditional” knowledge is always in flux and adapting to a quickly changing environment. Trends of globalization, especially the globalization of plant markets, have greatly influenced how plant resources are managed nowadays. While

ethnobotanical studies are now available from many regions of the world, no comprehensive encyclopedic series focusing on the world's mountain regions is available in the market. Scholars in plant sciences worldwide will be interested in this dynamic content. The field (and thus the market) of ethnobotany and ethnopharmacology has grown considerably in recent years. Student interest is on the rise, attendance at professional conferences has grown steadily, and the number of professionals calling themselves ethnobotanists has increased significantly. Various societies of such professionals include the Society for Economic Botany, the International Society of Ethnopharmacology, the Society of Ethnobiology, the International Society for Ethnobiology, and many regional and national societies in the field that currently have thousands of members. Growth has been most robust in BRIC countries. This new MRW on Ethnobotany of Mountain Regions covers the latest scholarship in the field of mountain research. It offers the best and latest research on a full range of descriptive, methodological, theoretical, and applied research on the most important plants for each region. Each contribution was scientifically rigorous and contributes to the overall field of study.
