

1. Record Nr.	UNINA9910416109503321
Autore	Reddy V. Ratna
Titolo	Climate-Drought Resilience in Extreme Environments // by V. Ratna Reddy, Y. V. Malla Reddy, M. Srinivasa Reddy
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-45889-X
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (XXX, 163 p. 28 illus., 21 illus. in color.)
Disciplina	333.730954
Soggetti	Agriculture Environment Physical geography Water Agricultural economics Environmental policy Environment, general Earth System Sciences Water, general Agricultural Economics Environmental Policy Canvi climàtic Desertització Agricultura Llibres electrònics Índia
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	CHAPTER I: Introduction -- CHAPTER II: Socioecological profile of the Rain-fed Regions -- CHAPTER III: Implementation Process: Quality, equity and Sustenance -- CHAPTER IV: Moving Towards Sustainable -- CHAPTER V: Making of Climate Smart Communities: Experiences and Learnings -- CHAPTER VI: Conclusions and Policy Imperatives -- References -- Appendices.

This book assesses the effectiveness of changes in watershed interventions in one of the most fragile resource regions of India. Specifically the chapters examine various watershed centred interventions and their implementation process. An evaluation of the livelihood impacts, including crop production on the communities, is discussed and an assessment of the drought and climate resilience of households in the context of watershed and related interventions, including institutions and capacity of the communities is investigated. Lessons are drawn to further identify measures to strengthen and improvise interventions for enhanced climate-drought resilience in harsh environments. .
