

1. Record Nr.	UNINA9910416111403321
Titolo	Plant Cell and Tissue Differentiation and Secondary Metabolites [[electronic resource]] : Fundamentals and Applications // edited by Kishan Gopal Ramawat, Halina Maria Ekiert, Shaily Goyal
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-11253-5
Collana	Reference Series in Phytochemistry, , 2511-834X
Disciplina	660.6
Soggetti	Biotechnology Plant biochemistry Plant breeding Medicinal chemistry Plant physiology Plant Biochemistry Plant Breeding/Biotechnology Medicinal Chemistry Plant Physiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cell differentiation and Secondary Metabolites -- Tissue differentiation and Secondary Metabolites -- Shoot differentiation and Secondary Metabolites -- Root differentiation and Secondary Metabolites -- Miscellaneous.
Sommario/riassunto	This reference work provides a comprehensive review of cell and tissue differentiation and its role in the formation of specific secondary metabolites. Divided into five sections, this book covers the main cellular processes involved in the biosynthesis of secondary metabolites. Chapters from expert contributors offer specific case studies of cell and tissue differentiation, examines secondary metabolites in shoot and root cultures, and present new scientific insights and original technologies with applications in medicinal plants and in plant biotechnology. Students, scholars and researchers with an

interest in the fields of botany, agriculture, pharmacy, biotechnology and phytochemistry will find this book an important account. This book will also engage professionals working in plant-based industry.
