1.	Record Nr.	UNINA9910416126603321
	Autore	Yang Yang <1975, >
	Titolo	Age-period-cohort analysis : new models, methods, and empirical applications / / Yang Yang and Kenneth C. Land
	Pubbl/distr/stampa	Boca Raton, Fla. : , : CRC Press, , 2013
	ISBN	1-000-21873-2 0-429-09620-8 1-4665-0753-5
	Edizione	[1st edition]
	Descrizione fisica	1 online resource (339 p.)
	Collana	Chapman & Hall/CRC interdisciplinary statistics series
	Altri autori (Persone)	LandKenneth C
	Disciplina	001.42/2 001.422 300.727
	Soggetti	Cohort analysis Age groups - Statistical methods Electronic books.
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	A Chapman & Hall book.
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	1. Introduction -- 2. Why cohort analysis? -- 3. APC analysis of data from three common research designs -- 4. Formalities of the age-period-cohort analysis conundrum and a generalized linear mixed models (GLMM) framework -- 5. APC accounting/multiple classification model, part I : model identification and estimation using the intrinsic estimator -- 6. APC accounting/multiple classification model, part II : empirical applications -- 7. Mixed effects models : hierarchical APC-cross-classified random effects models (HAPC-CCREM), part I : the basics -- 8. Mixed effects models : hierarchical APC-cross-classified random effects models (HAPC-CCREM), part II : advanced analyses -- 9. Mixed effects models : hierarchical APC-growth curve analysis of prospective cohort data -- 10. Directions for future research and conclusion.
	Sommario/riassunto	Age-Period-Cohort Analysis: New Models, Methods, and Empirical Applications is based on a decade of the authors' collaborative work in age-period-cohort (APC) analysis. Within a single, consistent HAPC-GLMM statistical modeling framework, the authors synthesize APC

models and methods for three research designs: age-by-time period tables of population rates or proportions, repeated cross-section sample surveys, and accelerated longitudinal panel studies. The authors show how the empirical application of the models to various problems leads to many fascinating findings on how outcome variables d
