ISBN	978-88-498-2251-9
Descrizione fisica	138 p. ; 23 cm
Collana	Saggi , Scienza politica ; 207
Disciplina	320.53094
Locazione	FSPBC
Collocazione	Collez. 2075 (207)
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNINA9910416134803321
Autore	Farver Carol
Titolo	Pulmonary Disease : Pathology, Radiology, Bronchoscopy // by Carol Farver, Subha Ghosh, Thomas Gildea, Charles D. Sturgis
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-47598-0
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (XVII, 376 p. 431 illus., 275 illus. in color.)
Disciplina	616.24075 616.24
Soggetti	Pathology Respiratory organs—Diseases Pneumology/Respiratory System Malalties del pulmó Patologia Radiologia Broncoscòpia Llibres electrònics

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Sommario/riassunto	<p>This book covers neoplastic and non-neoplastic pulmonary diseases, supplying essential information for the most common pulmonary diseases as well as many of the rarer ones. Organized around disease entities and presented in outline form, this book provides easy access to the essential facts and is illustrated with plentiful figures. The essential pathology, radiology and bronchoscopic technologies are discussed, as well as the tools needed to facilitate the most specific diagnoses and thus the most appropriate therapies. Each chapter also provides a list of suggested readings to guide further study. Written for a broad audience of clinicians who encounter these diseases in their everyday practice, this book serves specialists in pulmonary medicine and internal medicine, as well as general surgical pathologists who encounter these diseases as pulmonary specimens and who use this information for definitive evaluation and diagnoses of these entities, especially in small biopsies and cytopathology specimens. Pulmonary Disease: Pathology, Radiology, Bronchoscopy brings together the essential clinical, radiologic and pathologic insights for the major diseases of the lung, emphasizing the diagnostic criteria needed to ensure accurate diagnoses from small specimens.</p>
