

1. Record Nr.	UNINA9910416142003321
Titolo	Handbook of Macrocyclic Supramolecular Assembly // edited by Yu Liu, Yong Chen, Heng-Yi Zhang
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2020
ISBN	981-15-2686-9
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (1098 illus., 848 illus. in color. eReference.)
Disciplina	547
Soggetti	Chemistry, Organic Medicinal chemistry Physical chemistry Biophysics Atomic structure Molecular structure Organic Chemistry Medicinal Chemistry Physical Chemistry Atomic and Molecular Structure and Properties
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Section 1. Supramolecular Assemblies Based on Crown Ethers and Cyclophanes -- Chapter 1. Water-Soluble Aromatic Crown Ethers: from Molecular Recognition to Molecular Assembly -- Chapter 2. Polypseudorotaxanes Constructed by Crown Ethers -- Chapter 3. Host-Guest Chemistry of A Macrocyclic Containing p Systems Namely Cyclobis(paraquat-p-phenylene) -- Chapter 4. Mechanically Selflocked Molecules -- Chapter 5. Photo-luminescent Crown Ether Assembly. Section 2. Supramolecular Assemblies Based on Macrocyclic Arenes -- Chapter 1. Triptycene Derived Macrocyclic Arenes: from Calixarenes to Helicarenes -- Chapter 2. General Introduction of Some Emerging Macrocyclic Arenes Related to Calixarenes and Pillararenes -- Chapter 3. Macrocyclic Amphiphiles for Nanomedicine -- Chapter 4. Preparation of Biosensor Based on Supermolecular Recognizaiton -- Chapter 5.

Application of Anion- $\pi$  Interaction on Supramolecular Self-Assembly -- Chapter 6. Functional Rotaxanes: from Synthetic Methodology to Functional Molecular Materials -- Chapter 7. Biphenylarenes: Synthesis and Host-Guest Properties -- Chapter 8. Pillararene-based Supramolecular Polymer. Section 3. Supramolecular Assemblies Based on Cyclodextrins -- Chapter 1. Functionalized Cyclodextrins and Their Applications -- Chapter 2. Cyclodextrin Polyrotaxanes: Synthesis, Analytics and Functions -- Chapter 3. Cyclodextrin Hybrid Inorganic Nanocomposites for Molecular Recognition, Selective Adsorption and Drug Delivery -- Chapter 4. Photoresponsive Supramolecular Assembly with Biological Function -- Chapter 5. Cyclodextrin-based Supramolecular Hydrogel -- Chapter 6. Supramolecular Chiral Photochemistry -- Chapter 7. Construction and Functions of Supramolecular Cyclodextrin Polymer -- Chapter 8. Construction of Cyclodextrin-based Magnetic Supramolecular Assemblies and Its Regulation of Cell Mobility -- Chapter 9. Supramolecular Assemblies Based on Multi-Charge Cyclodextrin Induced Aggregation. Section 4. Supramolecular Assemblies Based on Cucurbiturils -- Chapter 1. Stimuli Responsive Self-Assembly Based on Macrocyclic Hosts and Biomedical Applications -- Chapter 2. Modulation of Chemical and Biological Properties of Biomedically Relevant Guest Molecules by Cucurbituril-type Hosts -- Chapter 3. Self-Assembled Two-Dimensional Organic Layers in Solution Phase -- Chapter 4. Modified Cucurbiturils with Various Ring Size: Synthesis -- Chapter 5. Modified Cucurbiturils with Various Ring Size: Assembly -- Chapter 6. Modified Cucurbiturils with Various Ring Size: Functions -- Chapter 7. Biological Systems Involving Cucurbituril -- Chapter 8. Cucurbituril-based Pseudorotaxanes and Rotaxanes -- Chapter 9. Construction of Supramolecular Networks Based on CB8. Section 5. Supramolecular Assemblies Based on Other Macrocycles -- Chapter 1. Supramolecular Catalysis Using Functional Organic Macrocycles and Molecular Cages -- Chapter 2. Porphyrins and Porphyrinoids: Syntheses, Structures, and Properties -- Chapter 3. Protein Self-Assembly: Strategies and Applications -- Chapter 4. Peptide Tectonics: towards Biomimetic and Bioinspired Soft Materials -- Chapter 5. Naphthol-based Macrocycles -- Chapter 6. Carbohydrate-based Macromolecular Self-Assembly -- Chapter 7. in vivo Self-Assembly of Polypeptide-based Nanomaterials -- Chapter 8. Construction of Well-Defined Discrete Metallacycles and Their Biological Applications. Section 6. Some Important Approaches in Macrocyclic-based Supramolecular Chemistry -- Chapter 1. Molecular Simulations of Supramolecular Architectures -- Chapter 2. Thermodynamic Studies of Supramolecular Systems -- Chapter 3. Spectral Studies of Supramolecular Systems -- Chapter 4. Artificial Host Molecules Modifying Biomacromolecules -- Chapter 5. Controllable Synthesis of Polynuclear Metal Clusters within Macrocycles -- Chapter 6. Integrating Macrocyclic Rings into Functional 3D Printing Materials -- Chapter 7. Molecular Recognition with Helical Receptors -- Chapter 8. Supramolecular Interface for Biochemical Sensing Applications -- Chapter 9. Supramolecular Functional Complexes Constructed by Orthogonal Self-Assembly -- Chapter 10. Aggregation Induced Emission of Macrocyclic-based Assemblies -- Chapter 11. Application of Rare Earth Metal Complexes in Macrocyclic-based Assemblies -- Chapter 12. Two Dimensional Supramolecular Framework Based on Host-Guest Self-Assembly. Section 7. Biological Applications -- Chapter 1. Theranostic Supramolecular Vesicle Systems -- Chapter 2. Host-Guest Sensing by Nanopores and Nanochannels -- Chapter 3. Highly Selective Ultrafast Proton Transport by Synthetic Unimolecular Proton Channels -- Chapter 4. Drug/Gene Delivery Platform Based on Supramolecular

Interactions: Hyaluronic Acid and Folic Acid as Targeting Units -- Chapter 5. Self-Assembling Peptides for Vaccine Development and Antibody Production -- Chapter 6. Supramolecules Assisted Transport of Ions and Molecules through Lipid Bilayers -- Chapter 7. Construction and Biomedical Applications of Macrocyclic-based Supramolecular Topological Polymers -- Chapter 8. Supermolecules as Medicinal Drugs -- Chapter 9. Nanoscaled Cyclodextrin Supermolecular System for Drug and Gene Delivery -- Chapter 10. Immunity Regulation by Cyclodextrin-based Supramolecular Assembly -- Chapter 11. Industrial Application of Cyclodextrin.

---

## Sommario/riassunto

This handbook presents recent advances and offers a comprehensive reference resource covering the developments in and applications of macrocyclic supramolecular assembly, with a focus on their construction, structural characters and biological functions. The main topics addressed include: Construction and structure of macrocyclic supramolecular assembly – key building blocks, construction methods, structural motifs, and stimuli responsive control Approach and technology – controllable synthesis, molecular recognition, spectral and thermodynamic study, supramolecular assembly at interfaces, orthogonal self-assembly, the supramolecular organic framework (SOF), molecular induced aggregation, supramolecule assisted 3D printing, theoretical calculation and molecular simulation Biological applications – chemical and biological sensing, theranostic tools, molecule/ion channels, drug/gene delivery, supramolecule assisted biomolecule production, supramolecule assisted transmembrane transport, supramolecule assisted immunity regulation, supramolecule-based medicinal drug, etc. This handbook appeals to graduate and undergraduate students as well as scientists with interests in supramolecular chemistry, biochemistry, functional material and nanotechnology.
