Disciplina	327.102854678
Soggetti	Internet and international relations
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The new US National Cyber Strategy points to Russia, China, North Korea and Iran as the main international actors responsible for launching malicious cyber and information warfare campaigns against Western interests and democratic processes. Washington made clear its intention of scaling the response to the magnitude of the threat, while actively pursuing the goal of an open, secure and global Internet. The first Report of the ISPI Centre on Cybersecurity focuses on the behaviour of these "usual suspects", investigates the security risks implicit in the mounting international confrontation in cyberspace, and highlights the current irreconcilable political cleavage between these four countries and the West in their respective approaches "in and around" cyberspace.
