Sommario/riassunto	Pionnier de la littérature tamoule contemporaine, C. S. Chellappa lui donne avec son chef-d'œuvre, Vâdivâçal, un texte fondateur de la fiction moderne. La langue, colorée, dense, précise, est nouvelle, chargée des saveurs dialectales, vibrante de la vie intime des villageois. Le sujet est plus neuf encore : décrit minutieusement, le jallikkattu, jeu taurin millénaire en train de disparaître, est le cadre d'un conflit dramatique entre un taureau exceptionnel et la vie et l'honneur de deux générations, père et fils, de tombeurs de taureaux. La vision zoome, alterne et halète entre la foule festive et complice et le drame du duel entre l'homme et l'animal, l'empathie de l'auteur allant à tous, pour plus d'émotion et de vérité. « Quand vous aurez lu ces pages, vous garderez le souvenir du taureau, de l'homme et du vâdivâçal. J'ai conscience de vous introduire dans un monde nouveau. » (C.S. Chellappa, préface) A pioneer of contemporary Tamil literature, C. S.

Chellappa gives us a founding text of modern Tamil fiction with his masterpiece, *Vâdivâçal*. The language is colourful, dense, precise, new, full of dialectal flavours, vibrant with the intimate life of the villagers. The subject is even more novel: described in detail, the *jallikkattu*, a centuries-old bullfighting game that is disappearing, is the setting for a dramatic conflict between an exceptional bull and the life and honour of two generations, father and son, of bullfighters. The vision zooms and alternates between the festive and complicit crowd and the drama of the duel between man and animal, the author's empathy going to all, for more emotion and truth. "Once you have read those pages you won't forget the bull, the man and the *vâdivâçal*. I am aware that I introduce you into a new world." (C.S. Chellappa, preface)

2. Record Nr.	UNINA9910789995403321
Autore	Moller Detlev
Titolo	Chemistry of the climate system [[electronic resource] /] / Detlev Moller
Pubbl/distr/stampa	Berlin ; ; New York, : De Gruyter, c2010
ISBN	1-283-16521-X 9786613165213 3-11-022835-1
Descrizione fisica	1 online resource (740 p.)
Classificazione	550
Disciplina	551.51/1
Soggetti	Atmospheric chemistry Meteorology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Front matter -- Prologue -- Preface -- List of principal symbols -- Contents -- 1 Introduction -- 2 Chemical evolution -- 3 Climate, climate change and the climate system -- 4 Fundamentals of physico-chemistry in the climate system -- 5 Substances and chemical reactions in the climate system -- 6 Final remark -- Appendix -- References -- Author index -- Subject index
Sommario/riassunto	Climate change is one of the biggest challenges facing the modern

world. The chemistry of the air within the framework of the climate system forms the main focus of this monograph. This problem-based approach to presenting global atmospheric processes begins with the chemical evolution of the climate system in order to evaluate the effects of changing air composition as well as possibilities for interference within these processes. Chemical interactions of the atmosphere with the biosphere and hydrosphere are treated in the sense of a multi-phase chemistry. From the perspective of a "chemical
