1.	Record Nr.	UNINA9910418311003321
	Titolo	Proceedings of the 2020 4th International Conference on Cloud and Big Data Computing / / Association for Computing Machinery
	Pubbl/distr/stampa	New York : , : Association for Computing Machinery, , 2020
	Descrizione fisica	1 online resource (130 pages) : illustrations
	Disciplina	005.7
	Soggetti	Big data Cloud computing
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Sommario/riassunto	The main goal and feature of the conference are to bring together scientists, engineers and industry researchers together to exchange and share their experiences, research results and discuss emerging practical problems and solutions. ICCBDC 2020 received 39 submissions of research papers. After a strict reviewing process, 23 of them have been accepted for presentation at the conference and publication in the proceedings. The conference program included invited talks, six research paper presentation sessions and one industry session. It covered recent trends and advances made in the fields of cloud and big data computing. All accepted papers were presented online in 15 minutes followed by discussions. This conference proceedings consists of the research papers presented at ICCBDC 2020.

2.	Record Nr.	UNINA9910955991403321
	Titolo	Philosophy and salvation in Greek religion / / edited by Vishwa Adluri

Sommario/riassunto

Ever since Vlastos' "Theology and Philosophy in Early Greek Thought," scholars have known that a consideration of ancient philosophy without attention to its theological, cosmological and soteriological dimensions remains onesided. Yet, philosophers continue to discuss thinkers such as Parmenides and Plato without knowledge of their debt to the archaic religious traditions. Perhaps our own religious prejudices allow us to see only a "polis religion" in Greek religion, while our modern philosophical openness and emphasis on reason induce us to rehabilitate ancient philosophy by what we consider the highest standard of knowledge: proper argumentation. Yet, it is possible to see ancient philosophy as operating according to a different system of meaning, a different "logic." Such a different sense of logic operates in myth and other narratives, where the argument is neither completely illogical nor rational in the positivist sense. The articles in this volume undertake a critical engagement with this unspoken legacy of Greek religion. The aim of the volume as a whole is to show how, beyond the formalities and fallacies of arguments, something more profound is at stake in ancient philosophy: the salvation of the philosopher-initiate.
