Sommario/riassunto	Naturwissenschaftliche Grundbildung im Sinne der Scientific Literacy umfasst das Erlernen inhaltlicher Konzepte sowie naturwissenschaftlicher Denk-, Arbeits- und Handlungsweisen. Auch in der Sachunterrichtsdidaktik werden entsprechende Ziele formuliert. Fachdidaktische und entwicklungspsychologische Forschungsergebnisse zeigen, dass Grundschulkindern systematische Strategien der Hypothesenprüfung (Variablenisolation und -kontrolle) erlernen können. Dabei scheint die Unterstützungsmaßnahme des Modeling besonders geeignet. In einem Prä-Post-Follow-up-Design mit Baseline wurden unter Kontrolle der Lernvoraussetzungen die Auswirkungen einer Förderung des Verständnisses der Variablenkontrolle im Kontext Magnetismus durch Modeling im Vergleich zu einem am Offenen Experimentieren orientierten Lernsetting auf (1) eigenständiges Bewerten und Entwickeln von Experimenten, (2) Transferfähigkeit, (3) Entwicklung, Durchführung und Bewertung eigener Experimente, (4) Qualität bzgl. des erreichten Niveaus der Experimente und (5) motivationale Schülermerkmale geprüft. Zur differenzierten Erfassung kamen ein Paper-Pencil-Test und ein videographiertes Interview zum Einsatz. Es konnte gezeigt werden, dass (1) beide Gruppen von der Intervention profitierten, die

Daten einer Baseline jedoch auf einen Testwiederholungseffekt hindeuteten. Einflüsse der Intervention auf die anderen Bereiche konnten nachgewiesen werden. Eine Förderung durch Modeling wirkte sich auf alle vier genannten Bereiche (2)-(5) positiv aus.

Sommario/riassunto

The nucleus of society is situated at the local level: in the village, the neighborhood, the city district. This is where a community first develops collective rules that are intended to ensure its continued existence. The contributors look at such configurations in geographical areas and time periods that lie outside of the modern Western world with its particular development of society and statehood: in Antiquity and in the Global South of the present. Here states tend to be weak, with obvious challenges and opportunities for local communities. How does governance in this context work? Scholars from various disciplines (Classics, Theology, Political Science, Sociology, Social Anthropology, Human Geography, Sinology) analyze different kinds of local arrangements in case studies, and they do so with a comparative approach. The sixteen papers examine the scope and spatial contingency of forms of self-governance; its legitimization and the collective identity of the groups behind them; the relations to different levels of state governance as well as to other local groups. Overall, this volume makes an interdisciplinary contribution to a better understanding of fundamental elements of local governance and statehood.
