

1. Record Nr.	UNINA9910418324703321
Autore	Mazzuco Stefano
Titolo	Developments in demographic forecasting / / edited by Stefano Mazzuco, Nico Keilman
Pubbl/distr/stampa	Springer Nature, 2020 Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-42472-3
Edizione	[First edition, 2020.]
Descrizione fisica	1 online resource (viii, 258 pages) : illustrations; digital, PDF file(s)
Collana	The Springer Series on Demographic Methods and Population Analysis ; ; 49
Disciplina	304.6
Soggetti	Demography Statistics Statistics for Social Sciences, Humanities, Law
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1. Introduction- -- Chapter 2. Stochastic population forecasting: A Bayesian approach based on evaluation by experts -- Chapter 3. Using expert elicitation to build long-term projection assumptions -- Chapter 4. Post-Transitional Demography and Convergence: What can we Learn from Half a Century of World Population Prospects? -- Chapter 5. Projecting Proportionate Age-Specific Fertility Rates via Bayesian Skewed Processes -- Chapter 6. A Three-component Approach to Model and Forecast Age-at-death Distributions -- Chapter 7. Alternative forecasts of Danish life expectancy -- Chapter 8. Coherent mortality forecasting with standards: low mortality serves as a guide -- Chapter 9. European mortality forecasts: Are the targets still moving? -- Chapter 10. Bayesian disaggregated forecasts: Internal migration in Iceland -- Chapter 11. Forecasting origin-destination-age-sex migration flow tables with multiplicative components -- Chapter 12. New Approaches to the Conceptualization and Measurement of Age and Ageing.
Sommario/riassunto	This open access book presents new developments in the field of demographic forecasting, covering both mortality, fertility and migration. For each component emerging methods to forecast them are

presented. Moreover, instruments for forecasting evaluation are provided. Bayesian models, nonparametric models, cohort approaches, elicitation of expert opinion, evaluation of probabilistic forecasts are some of the topics covered in the book. In addition, the book is accompanied by complementary material on the web allowing readers to practice with some of the ideas exposed in the book. Readers are encouraged to use this material to apply the new methods to their own data. The book is an important read for demographers, applied statisticians, as well as other social scientists interested or active in the field of population forecasting. Professional population forecasters in statistical agencies will find useful new ideas in various chapters.

Sommario/riassunto	<p>This mesmerizing original short story-a prequel to <i>The Sleepwalker</i> - from Chris Bohjalian, bestselling author of <i>The Sandcastle Girls</i> and <i>The Guest Room</i>, tells the tale of one strange summer when a pair of horses die, an odd boy moves to a small Vermont town, and a woman rises from her bed and disappears into the night. Lianna Ahlberg is seventeen when a thunderstorm snaps a power line to the earth, electrifying the ground, the rain spreading the current like wildfire across the wet grass. Two horses are killed in the nearby field, unnerving the neighbors, upsetting the peculiar boy who has just moved in, and filling Lianna with a deep and abiding sense of dread. This is not the first unusual thing to happen that summer-a summer when Lianna's mother begins to sleepwalk in the smallest hours of morning-and it will not be the last.</p>
