

1. Record Nr.	UNINA9910418331703321
Titolo	Water cycle
Pubbl/distr/stampa	Beijing, China : , : KeAi Publishing Communications Ltd [Amsterdam] : , : Elsevier B.V., , [2020]-
ISSN	2666-4453
Descrizione fisica	1 online resource
Disciplina	333.7 550
Soggetti	Water-supply Hydrologic cycle Eau - Approvisionnement Cycle hydrologique Periodical Periodicals. Zeitschrift Périodiques.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	"Water plays a critical role in supporting life and ecosystems. However, a combination of ever-growing demands on water resources and low water use efficiency has caused severe water and environmental stresses, increasing the risk of contamination. An interdisciplinary, integrated and balanced approach is required to secure the safety of the water supply and water environmental management systems"-- About the journal. Refereed/Peer-reviewed
