Livello bibliografico	Monografia
Nota di contenuto	Producing, handling and archiving evidence in Mediterranean societies -- 'Men like the Franks' : dealing with diversity in Medieval norms and courts -- Ottoman legal attitudes towards diversity.
Sommario/riassunto	Breaching the Bronze Wall deals with the idea that the word of honorable Muslims constituted proof and with the concept that written documents and the word of non-Muslims were inferior. Foreign merchants in cities like Istanbul, Damascus or Alexandria could barely prove any claim, as neither their contracts nor their words were of any value if countered by Muslims. Francisco Apellaniz explores how both groups labored to overcome these 'biases against non-Muslims' in the courts and markets of Mamluk Egypt and Syria of the 14th and 15th centuries, and how the Ottoman conquest (1517) imposed a new, orthodox view on the problem. The book dives into the Middle Eastern archive and the Ottoman Divan , and scrutinizes the intricacies of sharia and the handling of these intricacies by consuls, dragomans, qadis and other legal actors.
