Sommario/riassunto	Explorations in Ethics is a collection of essays with a speculative bent.

Its twelve contributors attempt to take ethics thinking in new directions. Ethics is fundamentally a speculative discipline. We sometimes lose sight of that because of our current scholarly practices, which include reliance on a set of traditional works in ethics, deferring to the scholarly literature, drawing from the evidential sources afforded us. This volume breaks the mold. It is committed, first and foremost, to exploring new ground in a methodologically sound way whilst respecting and building on the literature where needed. The contributors range from world renowned ethicists to early-career scholars. The ethical standpoints represented are various and the overall aim of this collection is to stimulate fresh thinking.
