

1. Record Nr.	UNINA9910420934703321
Autore	Rui Tavares
Titolo	Folias Mitocondriais : uma breve viagem sobre a energia da vida / / conceito e texto Anabela Marisa Azul, João Ramalho-Santos, Paulo Jorge Oliveira, Ilustração Rui Tavares
Pubbl/distr/stampa	Coimbra University Press, 2020 Portugal : , : Coimbra University Press, , 2020
ISBN	989-26-2004-6
Descrizione fisica	1 online resource (56 pages) : illustrations; digital, PDF file(s)
Collana	Outros Títulos
 Lingua di pubblicazione	Portoghese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Communicating through comics can be an effective multi-layered strategy. The narrative of this comic transports the reader to a realistic, if abbreviated, view of mitochondrial biology blended with the changing daily routines of Lara. Lara is a fictionalized patient with an undisclosed metabolic disorder, who takes her health into her own hands, becoming interested in metabolism and mitochondria to better understand the processes by which living organisms convert food into energy at the cellular level. Moreover, her goal is also to communicate this fascinating world to friends and colleagues, in a way that may also be useful for scientists and the general public. The comic combines the discoveries of real individuals who have greatly contributed to the knowledge of mitochondria, namely Peter Mitchell, Hans Adolf Krebs and Lynn Margulis, with fictional characters, such as Lara and George, directly associated to the narrative. The interdisciplinary nature of graphic narration reflects the blending of text and scientific facts alongside visual information (both realistic and caricature-like) and critical-thinking-based dialogues and actions, that was enriched by the collaborative work between the researchers who developed the concept and the illustrator who brought it to life.

2. Record Nr.	UNISA996218296603316
Titolo	Continental margin sedimentation [[electronic resource]] : from sediment transport to sequence stratigraphy / / edited by C.A. Nittrouer ... [et al.]
Pubbl/distr/stampa	Malden, MA, : Blackwell Pub., 2007

Soggetti	Sedimentation and deposition Sedimentology Sequence stratigraphy Sediment transport Continental margins
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Eel margin sediment dispersal systemSEABED FAILURE; General considerations; Eel margin failure; GRAVITY FLOWS; General considerations; MARGIN MORPHOLOGY; General considerations; New Jersey margin morphology; Eel margin morphology; MARGIN STRATIGRAPHY; General considerations; New Jersey margin stratigraphy; Eel margin stratigraphy; CONCLUSIONS; ACKNOWLEDGEMENTS; REFERENCES; Sediment delivery to the seabed on continental margins THE NORTHERN CALIFORNIA MARGIN
Sommario/riassunto	This volume on continental margin sedimentation brings together an expert editorial and contributor team to create a state-of-the-art resource. Taking a global perspective, the book spans a range of

timescales and content, ranging from how oceans transport particles, to how thick rock sequences are formed on continental margins. Summarizes and integrates our understanding of sedimentary processes and strata associated with fluvial dispersal systems on continental shelves and slopesExplores timescales ranging from particle transport at one extreme, to deep burial at the otherInsi
