Sommario/riassunto	Chemistry and fantasy, art and science, photography and music, education and play, technology and communicative desire, civil passion and didactic commitment not already (or not only) form a pleasantly new and bizarre mixture, but a very original score that invites you to think to the functioning of objects that seem banal and banal are not, which makes the gaze penetrate into the depth of common things and shows them to us as if we were seeing them for the first time. The secret consists in the pen of a writer with a light hand, a scientist-poet who is a man of school and is able with enthusiasm to weld together inventive energy and scientific competence. The opportunity is not to be missed, because a new contact with the world can arouse new emotions, new thoughts, new feelings.
