

1. Record Nr.	UNINA9910424569203321
Autore	Calà Piergiuseppe
Titolo	Studio sulla contaminazione ambientale delle acque causata dall'escrezione umana dei farmaci // Piergiuseppe Calà; coordinatore Prof. Paolo Antonio Nassi, docente guida Prof.ssa Raffaella Capei
Pubbl/distr/stampa	Firenze : , : Firenze University Press, , 2007
ISBN	9788864531687 9788884535832
Descrizione fisica	1 online resource (108 pages) : illustrations, charts; digital, PDF file(s)
Collana	Tesi. Biomedica ; ; 1
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	The use of substances for pharmaceutical use, either as disinfectants or used clinically for diagnostic purposes or for cosmetic products or for personal hygiene & wide and widespread in all areas of daily and working life. In recent years, studies on environmental contamination caused by PPCPs (Pharmaceuticals and Personal Care Products) have essentially dealt with the consequences deriving from the dispersion of antibiotic substances or hormonal, in relation respectively to the phenomenon of increased bacterial resistance and interference on endocrine systems.
