Sommario/riassunto	The archive of the National Association of University Teachers allows us to focus on the little known contribution that an avant-garde of university professors has made to the reform process of the University which has developed since 1968, after the failure of the 2314 bill. he immediately recognized himself in the leadership of Giorgio Spini, professor of history in the faculty of teaching in Florence, who accompanied the union management with a constant political and cultural elaboration, capable of projecting the university question into a long-term problematic dimension. The student movement has been a fundamental interlocutor from the beginning, whose initiatives ANDU supports the initiatives, condemning the police repression and the closure of the academic authorities.
