1. Record Nr. UNINA9910426055703321

   Titolo Encyclopedia of medical immunology : immunodeficiency diseases / / edited by Ian R. MacKay, 3 others

   Pubbl/distr/stampa New York, New York : , : Springer, , [2020]
   Â©2020

   ISBN 1-4614-8678-5

   Edizione [1st ed. 2020.]

   Descrizione fisica 1 online resource (73 illus., 60 illus. in color. eReference.)

   Disciplina 354.81150006

   Soggetti Immunologic diseases
   Immunology
   Immunodeficiency

   Lingua di pubblicazione Inglese

   Formato Materiale a stampa

   Livello bibliografico Monografia

   Nota di contenuto From the Content: Complement Deficiencies -- Dysregulation -- Defects in Innate Immunity -- Combined Immunodeficiencies -- Combined Immunodeficiencies with Associated or Syndromic Features -- Predominantly Antibody deficiency -- Autoinflammatory Disorders -- Defects of Phagocyte Number, Function, or Both -- Evaluation and Management of Immunodeficiency.

   Sommario/riassunto Volume Immunodeficiency Diseases in Springer's gold-standard reference work on medical immunology focuses on infectious diseases. In tandem with its three counterpart volumes it offers the most wide-ranging and authoritative repository of knowledge on infectious diseases, with readily accessed contributions by the world's leading authorities on the subject. The encyclopedia covers the material from all angles, with more than 1000 pages of essays on the genetics, physiology, metabolism, pathogenesis and applied microbiology of all known infectious diseases, and includes access to an e-reference work that will include ongoing updates reflecting the latest advances in the field. An outstanding new resource of immense value to a wide range of medical researchers and practitioners, the encyclopedia features a user-friendly subdivision of diseases according to their affective locus in the human body. The sections cover integumentary, skeletal,

respiratory, digestive, urinary, and reproductive transmissible pathogens. This high-profile encyclopedia will be an essential addition to academic libraries worldwide.
