Reflecting on Dialectical Thought Patterns.
Sommario/riassunto	This book compels professionals to actively imbibe self-awareness in their thought process in order to help them manage complexities in business. The authors explore dialectical thinking –in contrast to logical thinking—and introduce a new mind-opening thinking process called “Metathinking”. Four case studies demonstrate the application of Metathinking. The reader shall come across, and learn from, a multitude of mind opening questions on a variety of topics, with particular focus on leadership and transformation. Practical exercises are also offered for training and discussion in the workplace.
