Sommario/riassunto	This edited volume explores human security challenges in the context of Turkey. Turkey occupies a critical geopolitical position between Europe, the Middle East and the Caucasus. It is an important peace-broker in regional conflicts and a leading country in peacekeeping operations, and has been a generous donor for disaster response around the world. However, Turkey is also facing a number of fundamental sociocultural and development challenges and its internal stability is affected by a protracted armed conflict based on Kurdish separatism. In other words, Turkey is at a crossroads in its transformation from a state-centred security perspective to one based on human security. To explore selected human security challenges within a wider context of peace and development, this volume focuses on a number of key issues in relation to democratization and social cohesion, before going on to investigate the role of Turkey as an agent of peace in the international context. Written by academics from the

fields of peace studies, international relations, politics and development studies, the discussions examine and highlight the issues that Turkey must overcome if it is to successfully strengthen its human security trajectories in the near future. This book will be of much interest to students of human security, Turkish politics, conflict management, peace studies and IR in general.

#### Sommario/riassunto

This book constitutes the refereed proceedings of the 21st International Conference on Product-Focused Software Process Improvement, PROFES 2020, held in Turin, Italy, in November 2020. Due to COVID-19 pandemic the conference was held virtually. The 19 revised full papers and 3 short papers presented were carefully reviewed and selected from 68 submissions. The papers cover a broad range of topics related to professional software development and process improvement driven by product and service quality needs. They are organized in topical sections on Agile Software Development.
