

1. Record Nr.	UNINA9910427685903321
Titolo	Handbook of Small Satellites : Technology, Design, Manufacture, Applications, Economics and Regulation // edited by Joseph N. Pelton, Scott Madry
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-36308-2
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (476 illus., 441 illus. in color. eReference.)
Disciplina	629.46
Soggetti	Solar system Aerospace engineering Astronautics Telecommunication Environmental monitoring Space Physics Aerospace Technology and Astronautics Communications Engineering, Networks Environmental Monitoring
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	In the past decade, the field of small satellites has expanded the space industry in a powerful way. Hundreds, indeed thousands, of these innovative and highly cost-efficient satellites are now being launched from Earth to establish low-cost space systems. These smallsats are engaged in experiments and prototype testing, communications services, data relay, internet access, remote sensing, defense and security related services, and more. Some of these systems are quite small and are simple student experiments, while others in commercial constellations are employing state-of-the-art technologies to deliver fast and accurate services. This handbook provides a comprehensive overview of this exciting new field. It covers the technology,

applications and services, design and manufacture, launch arrangements, ground systems, and economic and regulatory arrangements surrounding small satellites. The diversity of approach in recent years has allowed for rapid innovation and economic breakthroughs to proceed at a pace that seems only to be speeding up. In this reference work, readers will find information pertaining to all aspects of the small satellite industry, written by a host of international experts in the field.
