Nota di contenuto	Current conceptualizations of dynamic risk factors -- Critical analysis of dynamic risk factors -- Reformulating dynamic risk factors -- Research, assessment and treatment implications of the dynamic risk conceptual framework.
Sommario/riassunto	Dynamic risk factors add a key element to the activities of practitioners seeking to reduce recidivism in criminal populations. This book focuses on the usefulness of dynamic risk factors and their ability to provide reliable information about the likelihood of reoffending. Practitioners increasingly depend on such assessments for more accurate prediction of recidivism as well as for improving the design of intervention programs.
