Sommario/riassunto	This book has two aims. First, to provide a critical legal examination of the liberal state and liberal rights in the law, and secondly, to present a systematic alternative to liberal approaches to both the law and rights, grounded in a left wing conception of human dignity. At the opening of the 21st century a remarkable thing happened. Liberalism, once considered the only doctrine left standing at the end of history, began to face renewed competition from both the political left and the post-modern conservative right. This book argues that the way forward is not to abandon, but to radicalize, the potential of the liberal project. Analysing major theoretical positions in order to build a critical

genealogy of liberal rights, McManus lucidly develops a left wing alternative to the classic liberal approach to rights drawing on the traditions of liberal egalitarians and deliberative democracy theory. Societies, he argues, should be committed to advancing the human dignity of all through the enshrinement of certain rights into positive state law, the expansion of democracy and a resolute commitment to economic equality. Matthew McManus is a Professor of Politics at Whitman College and the author of *Making Human Dignity Central to International Human Rights Law* and *The Rise of Post-Modern Conservatism*, amongst other books.
