

1. Record Nr.	UNINA9910427733403321
Autore	Claude Henry
Titolo	Standing up for a sustainable world : voices of change / / edited by Claude Henry, Johan Rockström, Nicholas Stern
Pubbl/distr/stampa	Northampton : , : Edward Elgar Publishing, , 2020
ISBN	1-80037-178-0
Descrizione fisica	1 online resource (496 pages)
Disciplina	338.927
Soggetti	Sustainable development Environmental economics Biodiversity conservation Sustainability Climatic changes Environmental degradation Biodiversity - Climatic factors Biodiversity - Effects of air pollution on
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents: Preface: A collective book project - the last chance? Voluntary actors in an ecological and economic transition -- Part I: Introduction -- Section 1. Scientific backgrounds -- 1. Science, society and a sustainable future / Johan Rockstrom and Nicholas Stern -- 2. Conservation psychology and climate change / Susan Clayton -- 3. Capitalism and the curse of external effects / Claude Henry -- Section 2. Setting the scene -- 4. Costa Rica as pioneer of a green social contract / Monica Araya -- 5. The carbon tax in Sweden / Thomas Sterner -- 6. Lessons from the Obama White House: how climate policy really gets done / Alice C. Hill -- 7. Climate policy in China: an overview / Ye Qi, Xiaofan Zhao and Nicholas Stern -- 8. The Paris Agreement on climate change: What legacy? / Laurence Tubiana and Emmanuel Guerin -- Part II: Defenders -- 9. Introduction to Part II / Jonathan Watts -- 10. To protect the Amazon, defend the people of the forest / Maria do Socorro Costa Silva -- 11. Of chainsaws and grace: Direct action by eco-vigilantes in the Philippines / Bobby Chan -- 12.

Social justice goes hand in hand with environmental campaigns - and not just in Africa / Phyllis Omido -- 13. Living our values: Using art and technology to campaign for nature in Turkey / Birhan Erkutlu and Tuba Gunal -- Part III: Litigants -- 14. Introduction to Part III / Marie Toussaint and Claude Henry -- 15. The Urgenda case in the Netherlands: creating a revolution through the courts / Marjan Minnesma -- 16. Juliana v. United States and the global youth-led legal campaign for a safe climate / Patti Moore, Danny Noonan and Erik Woodward -- 17. How policymakers imperil coming generations' future and what to do about it / Ridhima Pandey -- 18. Protecting the rights of future generations through climate litigation: lessons from the struggle against deforestation in the Colombian Amazon / Camila Bustos, Valentina Rozo-Angel and Gabriela Eslava-Bejarano -- 19. People's climate case - families and youth take the EU to court over its failure to address the climate crisis / E. Deville, L. Dubois Gokahin -- 20. Climate change claim on behalf of New Zealand's indigenous Maori peoples / Michael Sharp, Nicole Smith and Tania Te Whenua -- 21. France: L'affaire du siècle : the story of a mass mobilization for climate / Marie Toussaint -- Part IV: Coming generations on the front line -- 22. Introduction to Part IV / Claude Henry -- 23. Fridays for Future - FFF Europe and beyond / Anuna De Wever, Luisa Neubauer and Katrien van der Heyden -- 24. The Fridays for Future movement in Uganda and Nigeria / Hilda Flavia Nakabuye, Sadrach Nirere and Adenike Titilope Oladosu -- 25. The origins of school strike 4 climate NZ / Sophie Handford and Raven Maeder -- 26. 350.org 231 / William "Bill" McKibben -- 27. How to become an engineer in the ecological crisis? / Antoine Bizien, Elsa Deville and Lucas Dubois -- 28. Ecological aspirations of youth: How higher education could fall between two stools / Alessia Lefebure -- Part V: Entrepreneurs -- 29. Introduction to Part V / Nicholas Stern and Charlotte Taylor -- 30. Catching mighty north sea winds / Claude Henry -- 31. Providing electricity from rice husk in rural India / Claude Henry -- 32. Heat pumps for decarbonizing buildings / Dominique Bureau -- 33. The rise of supercapacitors: Making electric vehicles as convenient as ordinary ones / Claude Henry -- 34. From scooter to boat: innovations in electric transport in cities of Southeast Asia / Pippo Ranci -- 35. The third attempt at the electric car might be the successful one / Geoffrey Heal -- 36. Solar cookstoves for adaptation to degrading natural conditions / Claude Henry -- 37. Carbon capture from ambient air: a brake on climate change? / Claude Henry -- 38. Ecological engineering in coastal protection / Claude Henry -- 39. Better to corrupt plastics than the environment / Pippo Ranci -- 40. Drip irrigation: Daniel Hillel's legacy / Claude Henry -- 41. Making the case for agroecological innovation: the need for technical but also political entrepreneurs / Sebastien Treyer -- 42. Radical transformation in global supply chains: can new business models be based on biodiversity in the agrifood industry? / Sebastien Treyer -- 43. Ethan Brown - the protein revolutionary / Geoffrey Heal -- 44. How to make a sustainable living in a tropical forest: the case of Surui Indians in the Amazon Rainforest - success under threat / Claude Henry -- 45. Migrants to repopulate depopulated villages - Riace in Calabria, Italy and its mayor Mimmo Lucano / Pippo Ranci -- 46. How Loos-en-gohelle, a derelict mining town in the north of France, has become a standard in sustainable development / Michel Berry -- Part VI: Investors -- 47. Introduction to Part VI / Nicholas Stern and Charlotte Taylor -- 48. Unleashing the power of financial markets for the green transition / Jeremy Oppenheim and Catharina Dyvik -- 49. The case for fossil fuel divestment / Stephen B. Heintz -- 50. How can finance be used to combat climate

change? / Alain Grandjean -- 51. China's pioneering green finance / Ma Jun -- Part VII: Communicators -- 52. Introduction to Part VII / Johan Rockstrom -- 53. Communicating climate change science to diverse audiences / Asmeret Asefaw Berhe -- 54. Global marine fisheries: avoiding further collapses / Philippe Cury and Daniel Pauly -- 55. Why are we so much more afraid of Covid-19 than of climate change? Early lessons from a health crisis for the communication of climate change / Francois Gemenne and Anneliese Depoux -- 56. Communicating the climate emergency: Imagination, emotion, action / Genevieve Guenther -- 57. Climate change: From research to communication / Jean Jouzel -- 58. Communicating biodiversity loss and its link to economics / Georgina M. Mace -- 59. Helping trusted messengers find their voice on climate change / Edward Maibach -- 60. From climate scientist to climate communicator: a process of evolution / Michael E. Mann -- 61. Communicating science beyond the ivory tower / David R. Montgomery -- Index.

Sommario/riassunto

"The world has witnessed extraordinary economic growth, poverty reduction and increased life expectancy and population since the end of WWII, but it has occurred at the expense of undermining life support systems on Earth and subjecting future generations to the real risk of destabilising the planet. This timely book exposes and explores this colossal environmental cost and the dangerous position the world is now in. Standing up for a Sustainable World is written by and about key individuals who have not only understood the threats to our planet, but also become witness to them and confronted them. Combining the voices of leading academics as well as climate change and environmental activists, entrepreneurs and investors, the book highlights the urgent action that needs to be taken to foster sustainable, resilient and inclusive development in the face of powerful systemic forces. Chapters look ahead to a better path for human wellbeing, security and dignity, offering insight to ways this can be created. The book as a whole shares the visions and hopes of those fighting in a myriad of ways to make a sustainable world, attempting to tip the balance away from the crushing loss of biodiversity, rising sea levels and increasing global mean temperature, whilst increasing living standards across all dimensions, particularly for the poorest people. An imperative read for those concerned about the future of our planet, this book showcases not only why urgent action is now imperative, but also what changes are necessary for a sustainable, resilient and equitable world. It offers crucial insights for those interested in the dynamics of political action, in how change occurs, and in effective communication. Environmental economics, as well as environmental studies and human geography students and scholars more broadly will find this an invigorating read"--
