

1. Record Nr.	UNINA9910428459703321
Titolo	Endocrinologia : malattie del metabolismo / Comitato editoriale Dario Giugliano ... [et al.]
Pubbl/distr/stampa	Napoli, : Idelson-Gnocchi, c2021
ISBN	978-88-7947-7215
Edizione	[4. ed.]
Descrizione fisica	XIX, 506 p. : ill. ; 26 cm
Disciplina	616.4
Locazione	FFABC FMEBC SC1
Collocazione	80 217/XXII 88 80 216/XXII 89 80 215/XXII 90 90 R 9a 51 90 R 9a 52 90 R 9a 53 90 R 9a 54 90 R9a 55 90 R9a 56 80 412/XXII 108 616.4-GIU-1 616.4-GIU-1A 616.4-GIU-1B
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910437575103321
Autore	Ribeiro Marcio Moretto
Titolo	Belief revision in non-classical logics // Marcio Moretto Ribeiro
Pubbl/distr/stampa	London ; ; New York, : Springer, 2012, c2013
ISBN	1-283-61173-2 9786613924186 1-4471-4186-5
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (126 p.)
Collana	SpringerBriefs in computer science, , 2191-5768
Disciplina	006.3
Soggetti	Nonclassical mathematical logic Logic, Symbolic and mathematical Belief and doubt
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Preface -- Introduction -- Consequence -- Logics -- Classical Belief Revision -- AGM Contraction in Non-Classical Logics -- AGM Revision in Logics without Negation -- Base Revision in Logics without Negation -- Algorithms for Belief Bases -- Conclusion -- Index.
Sommario/riassunto	Since the advent of the Semantic Web, interest in the dynamics of ontologies (ontology evolution) has grown significantly. Belief revision presents a good theoretical framework for dealing with this problem; however, classical belief revision is not well suited for logics such as Description Logics. Belief Revision in Non-Classical Logics presents a framework which can be applied to a wide class of logics that include – besides most Description Logics such as the ones behind OWL – Horn Logic and Intuitionistic logic, amongst others. The author also presents algorithms for the most important constructions in belief bases. Researchers and practitioners in theoretical computing will find this an invaluable resource.
