

1. Record Nr.	UNINA9910431342803321
Autore	Choromanski Kacper
Titolo	Bloodstain pattern analysis in crime scenarios // Kacper Choromanski
Pubbl/distr/stampa	Singapore : , : Springer, , [2021] ©2021
ISBN	981-334-428-8
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (X, 65 p. 29 illus., 28 illus. in color.)
Collana	SpringerBriefs in Applied Sciences and Technology
Disciplina	570.285
Soggetti	Bloodstain pattern analysis Bioinformatics Forensic sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. Introduction -- 2. Basics of bloodstain pattern analysis -- 3. Homicide scenario -- 4. Suicide scenario -- 5. Current problems of Bloodstain Pattern Analysis.
Sommario/riassunto	This book introduces the core concepts of bloodstain pattern analysis that help to understand and make independent contributions to crime scenes accurately. It presents a bridge between new research results and the practical work field of crime scene investigation in bloodstain pattern analysis, by showing and detailing reports of two different scenarios. The scenarios presented have an extensive description of gathered evidence and are diversified with real crime scene photography and sketches. This kind of case report is rare in scientific books, but the author, as a researcher, has permission from the authorities to present the cases. The book finally concludes with the main problems of modern bloodstain pattern analysis and discusses the way forward.
