2.3.2 Vibration evaluation history

Sommario/riassunto

In many plants, vibration and noise problems occur due to fluid flow, which can greatly disrupt smooth plant operations. These flow-related phenomena are called flow-induced vibration. This book explains how and why such vibrations happen and provides hints and tips on how to avoid them in future plant design. The world-leading author team doesn't assume prior knowledge of mathematical methods and provides the reader with information on the basics of modeling. The book includes several practical examples and thorough explanations of the structure, the evaluation method

Sommario/riassunto

With a specific focus on travel narratives, this collection looks at how various Islamic and eastern cultural threads weaved themselves, through travel and trading networks, into Western European/Christian visual culture and discourse and, ultimately, into the artistic explosion which has been labeled the 'Renaissance'. Scholars from across humanities disciplines examine Islamic, Jewish, Spanish, Italian, and English works from a truly comparative and non-parochial perspective, to explore the transfer through travel of cultural and religious values and artistic and scientific practices, from the eleventh to the seventeenth centuries.

Sommario/riassunto	<p>Der Band versammelt kritische Perspektiven auf digitale Transformationen und diesen zugrunde liegende Mechanismen wie Quantifizierung, Algorithmisierung und Kommerzialisierung. Die Autor*innen aus Medienpädagogik, Erziehungswissenschaft, Bildungsforschung und Medienwissenschaft problematisieren in ihren Beiträgen Tendenzen der ökonomistischen und technizistischen Vereinnahmung und beschreiben widerständige Praktiken. Ihnen allen geht es dabei auf je spezifische Weise um die Frage nach dem komplexen Verhältnis des Subjektes zu Gesellschaft, Institutionen und Medien – und Möglichkeiten seiner Veränderung.</p> <p>Die Publikation von Dander u. a. Ist für diejenigen interessant, die sich mit Digitalisierung auf vielen verschiedenen Ebenen auseinandersetzen möchten(...)Die Beiträge sind dabei sowohl auf einem hohen fachlichen Niveau als auch gut lesbar gehalten. Merz_medien + Erziehung (Zeitschrift für Medienpädagogik)/ Oktober 2020</p> <p>Digitalisierung – Subjekt – Bildung lädt zu reflektierendem und neugierigem Lesen ein und ermöglicht Denkreisen, In-sich-gehen und Analyse – ein großartiges, überaus aktuelles Buch!socialenet.de, 25.08.2021</p>
