Sommario/riassunto	The contributions of this volume aim at a new, evidence based approach to Jihadism studies. What is the structure of Jihadi online communication and the dissemination of operational material online? Which errors were made by conventional Jihadism research? Which programs, apps, etc. use Jihadis to further their online communication? Next to these questions the contributors discuss the evident inability to understand basic mathematical principles in conventional Jihadism research and consider a very important video as a case study of Jihadi online communication, stressing the linguistic and theological shortcomings of conventional research. The volume is based on the understanding of theological elements as a vital part of Jihadi communication.

	Sommario/riassunto	Through a comprehensive case study of the twelfth-century Crusaders' Kingdom of Jerusalem, the author shows how a changing international system encourages or retards the development of social structures, thereby relating the Crusaders' experience to contemporary affairs. The Kingdom's social structure was influenced by intensive Islamic pressure on all sides, and its eventual collapse was due almost entirely to its failure to adapt its suddenly irrelevant feudal institutions to the demands of its new situation. Professor Ben-Ami suggests that the patterns exemplified in this conflict enable the exploration of the general idea that societies interlocked in a prolonged conflict tend to

affect one another's social organization as they respond to developing needs implicated in the international system.
