| Titolo | Distributed medium access control in wireless networks // Ping Wang, Weihua Zhuang |
| Pubbl/distr/stampa | New York : , : Springer, , 2013 |
| ISBN | 1-4614-6602-4 |
| Edizione | [1st ed. 2013.] |
| Descrizione fisica | 1 online resource (xii, 109 pages) : illustrations |
| Collana | SpringerBriefs in Computer Science, , 2191-5768 |
| Disciplina | 004.6 |
| Soggetti | Wireless communication systems - Security measures |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | "ISSN: 2191-5768." |
| Nota di bibliografia | Includes bibliographical references. |
| Nota di contenuto | Introduction -- Literature Review and Background -- Voice Capacity Improvement over Infrastructure WLANs -- Service Differentiation over Ad Hoc WLANs -- Dual Busy-tone MAC for Wireless Ad Hoc Networks -- Collision-free MAC for Wireless Mesh Backbones -- Conclusions. |
| Sommario/riassunto | This brief investigates distributed medium access control (MAC) with QoS provisioning for both single- and multi-hop wireless networks including wireless local area networks (WLANs), wireless ad hoc networks, and wireless mesh networks. For WLANs, an efficient MAC scheme and a call admission control algorithm are presented to provide guaranteed QoS for voice traffic and, at the same time, increase the voice capacity significantly compared with the current WLAN standard. In addition, a novel token-based scheduling scheme is proposed to provide great flexibility and facility to the network service provider for service class management. Also proposed is a novel busy-tone based distributed MAC scheme for wireless ad hoc networks and a collision-free MAC scheme for wireless mesh networks, respectively, taking the different network characteristics into consideration. The proposed schemes enhance the QoS provisioning capability to real-time traffic and, at the same time, significantly improve the system throughput and fairness performance for data traffic, as compared with the most popular IEEE 802.11 MAC scheme. |
