1. Record Nr.   UNINA9910437591303321

   Titolo   Security and privacy in social networks / / Yaniv Altshuler ... [et al.,
                       editors]

   Pubbl/distr/stampa New York, : Springer, c2013

   ISBN   1-283-62377-3
                       9786613936226
                       1-4614-4139-0

   Edizione   [1st ed. 2013.]

   Descrizione fisica 1 online resource (253 p.)

   Altri autori (Persone) AltshulerYaniv

   Disciplina   006.7/54

   Soggetti   Online social networks - Security measures
                       Data encryption (Computer science)
                       Data protection
                       Computer crimes - Prevention

   Lingua di pubblicazione Inglese

   Formato   Materiale a stampa

   Livello bibliografico Monografia

   Note generali   Description based upon print version of record.

   Nota di bibliografia Includes bibliographical references and index.

   Nota di contenuto   Introduction to Security and Privacy in Social Networks --
                       Interdisciplinary Impact Analysis of Privacy in Social Networks --
                       Recognizing Your Digital Friends -- Encryption for Peer-to-Peer Social
                       Networks -- Crowdsourcing and Ethics -- The Effect of Social Status on
                       Decision-Making and Prices in Financial Networks -- Stealing Reality:
                       When Criminals Become Data Scientists (or Vice Versa) -- Applications
                       of k-Anonymity and -Diversity in Publishing Online Social Networks --
                       Links Reconstruction Attack -- An Analysis of Anonymity in the Bitcoin
                       System -- Privacy-Preserving Data Integration using Decoupled Data.

   Sommario/riassunto Security and Privacy in Social Networks brings to the forefront
                       innovative approaches for analyzing and enhancing the security and
                       privacy dimensions in online social networks, and is the first
                       comprehensive attempt dedicated entirely to this field. In order to
                       facilitate the transition of such methods from theory to mechanisms
                       designed and deployed in existing online social networking services,
                       the book aspires to create a common language between the
                       researchers and practitioners of this new area- spanning from the
                       theory of computational social sciences to conventional security and
