

1. Record Nr.	UNINA9910437764803321
Titolo	Sound, perception, performance / / Rolf Bader, editor
Pubbl/distr/stampa	Cham, : Springer International, 2013
ISBN	3-319-00107-8
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (392 p.)
Collana	Current Research in Systematic Musicology, , 2196-6966 ; ; 1
Altri autori (Persone)	BaderRolf
Disciplina	781.43
Soggetti	Music - Performance Perception
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Production and Perception Models -- Neurocognition and Evolution -- Applications.
Sommario/riassunto	Musical Performance covers many aspects like Musical Acoustics, Music Psychology, or motor and prosodic actions. It deals with basic concepts of the origin of music and its evolution, ranges over neurocognitive foundations, and covers computational, technological, or simulation solutions. This volume gives an overview about current research in the foundation of musical performance studies on all these levels. Recent concepts of synchronized systems, evolutionary concepts, basic understanding of performance as Gestalt patterns, theories of chill as performance goals or historical aspects are covered. The neurocognitive basis of motor action in terms of music, musical syntax, as well as therapeutic aspects are discussed. State-of-the-art applications in performance realizations, like virtual room acoustics, virtual musicians, new concepts of real-time physical modeling using complex performance data as input or sensor and gesture studies with soft- and hardware solutions are presented. So although the field is still much larger, this volume presents current trends in terms of understanding, implementing, and perceiving performance.
